**Subject:** Senator Schumer - New York Utility/EPA - PCP POLE STUDY

Dear Senator Schumer,

Please find a letter attached related to your request to have a study done about PentaChloroPhenol "Penta".

The short story is we have a problem and the EPA inaction is going to land us all in a Flint Michigan status or worse.

The report at the time noted 54 Million PCP poles in the US. Since the report I have read that number has more than doubled.

If you have time to read the report in detail you will note many of the issues I have spoken about including but not limited to the poles leaching crude oil and breaking the aquifers / ground water contamination from the depth of the placement of the poles and more.

This is also a great short film about the issue:

<http://www.wbrc.com/story/28944736/toxic-trouble-does-contamination-remain-in-the-soil-and-water>

Also in closing it's a shame the EPA did not offer this right with a noting that it would need to be updated.

What else do we not know ? What else has not been disclosed ?

\*\* There are alternative solutions and incremental safety policy steps that can avert a serious outcome.

Sincerely,  
Chuck Idol
